What is Centre?

The Centre was established as an organizational unit of the University of Kragujevac and officially opened on 16th of November 2007 with the main goal to prepare students to enter the job market after graduation, to connect them with the business community and to support them in acquiring skills and knowledge that are now necessary in the labor market.

The Center is designed as a student service that, through a variety of services and programs, provides support to students and graduates of the University of Kragujevac in career development and helps them to present themselves in the world of business after finishing their studies. .

We inform our students via...
